

DIMONOFF

## Bernard TETU - Founding President

Bernard Têtu, president of Dimonoff, is a Canadian serial-entrepreneur, and is behind the creation and investment of several well-known technology companies, including Berclain Group, GeocomTMS, and, with his brother Louis Tetu, Taleo Enterprise (NASDAQ: TLEO).

Bernard is an experienced president with a demonstrated history of working in the electrical and electronic manufacturing industry. He has strong business development skills in Urban Tech, Smart Cities, Entrepreneurship, Energy Efficiency, Manufacturing and Lighting Control.

Decorated with the distinction for exceptional achievement of a young engineer by the Order of Engineers of Canada, he also received the Entrepreneur's Award by the Association of Industrial Research Directors of Quebec.

He created Dimonoff in 2006, an innovative pioneer in wireless control and remote monitoring technologies. A master road networks and public infrastructures lighting, Dimonoff is among the top 5 leaders for smart street lighting control and is involved in 5 of the largest smart cities' projects in the world.

As CEO, he leads a team of 70 employees, half of them are engineers, in the development of a comprehensive smart city infrastructure management IoT platform, including solutions services in software, firmware, and electronic control & monitoring hardware.

Bernard collaborated closely in the deployment of LED conversion for public lighting in several cities such as Mississauga, Montreal, Shawinigan and Great Neck as responsible for the complete implementation of the wireless monitoring and lighting control system.

Among the round of investors, Bernard succeeded in obtaining funding from the Quebec government in 2018 to support Dimonoff in the marketing of new products intended for the management of smart cities.
